Name:	Address:
Owner's Signature:	Date: 20____

By signing this document, I agree that all information supplied on this form may be used in confidence by veterinary surgeons and geneticists researching suspected problems in cardiology in the Norfolk Terrier.

Note to Veterinary Surgeon

The Kennel Club has moved the Norfolk Terrier into their Breed Health and Conservation Plan under the umbrella of the Kennel Club Dog Health scheme. The Kennel Club's interest in the Norfolk concerns the low overall numbers registered and the possibility of the breed becoming endangered, and the potential impact of health issues on these low numbers. After months of discussion around surveillance options and diagnostics, including Doppler Ultrasound, the future input from the Veterinary Cardiology Society, and the assessment of data from Breed Health Surveys, VetCompass, etc., the Kennel Club has agreed to this plan with the Norfolk Terrier Club of Great Britain.

In the plan we aim to have all breeding dogs and bitches auscultated for cardiac murmurs once yearly, and advise that these dogs and bitches are withdrawn from breeding should a murmur of any kind be diagnosed.

VETERINARY OPINION

In accordance with the Norfolk Terrier Club of Great Britain Cardiac Auscultation Scheme I have examined this dog for presence of cardiac murmurs. I certify that at the time of my examination: (please tick where appropriate)

I was unable to detect a cardiac murmur

I detected a cardiac murmur, of grade [1 – 2 – 3 – 4 – 5 – 6] (please circle)
